SHUBHAM KUMAR

Frontend Developer

New Delhi, India | +91-9262919936 | hpshubham1999@gmail.com | LinkedIn | GitHub | HackerRank

PROFILE SUMMARY

Frontend Developer with 1+ year of production experience building clean, semantic, standards-based web interfaces with HTML5, CSS3 and JavaScript, alongside React.js, Next.js and TypeScript. Focused on modular, reusable code architecture, web performance and SEO best practices, and cross-browser reliability. Comfortable acting as a technical point of contact across designers, business analysts and backend engineers in Agile/Scrum, sprint-based teams — gathering requirements, executing, and delivering features on schedule.

CORE STRENGTHS

- Clean, semantic HTML5 and CSS3 with a strong focus on web standards and cross-browser compatibility, validated through manual and cross-browser testing.
- Component-driven code architecture: built a shared, reusable React component and styling system that cut new page development time by 35% — emphasis on modularity and reusability.
- CSS pre-processor experience with SCSS Modules (Sass syntax) alongside Tailwind CSS for scalable, maintainable styling systems.
- Performance and SEO-focused development — lazy loading, code splitting, asset compression and Next.js SSR/SSG, driving 40% faster load times and 30% SEO gains, verified via Lighthouse audits.
- Strong JavaScript (ES6+) fundamentals, applied through React.js and TypeScript in production; comfortable working directly in vanilla JS/DOM contexts.
- Cross-functional collaboration: acted as a technical touchpoint between UX designers, business analysts and backend engineers across 10+ Agile/Scrum release cycles, from requirements through deployment.
- Testing and quality discipline via manual testing, cross-browser testing, ESLint and structured code review as part of the regular development workflow.

EXPERIENCE

Junior Frontend Developer — *ProX Infotech Pvt. Ltd.* March 2025 – Present | New Delhi

- Promoted from Frontend Developer Intern within 6 months based on consistent delivery, code quality, and measurable impact on production systems.
- Built and maintained 15+ production-grade UI components and 20+ responsive web forms using HTML5, CSS3, SCSS Modules, Tailwind CSS, React.js and TypeScript — reducing UI bug reports by 40% and form submission errors by 30%.
- Converted UI/UX design specifications into clean, semantic, cross-browser-compatible markup, ensuring consistent rendering across 5 internal and client-facing workflows.
- Identified and resolved usability and interface issues in existing screens through systematic debugging and code review, improving overall interface quality across 2 sprint cycles.
- Integrated 10+ REST API endpoints with client-side validation and error handling, cutting API-related frontend issues by 25%.
- Collaborated directly with UX designers, business analysts and backend engineers in bi-weekly Agile/Scrum sprints, delivering features on time across 10+ release cycles with zero critical production incidents.

PROJECTS

ProX PC Official Website Aug 2025 – Present

- Led frontend development of the company's public-facing e-commerce website (proxpc.com), serving 5,000+ monthly visitors with 99.9% uptime across all major browsers and devices.
- Built a shared, reusable component and styling system (SCSS + Tailwind CSS), cutting new page development time by 35%.
- Implemented responsive, cross-device inquiry forms with client-side validation, increasing form completion rate by 20%.
- Improved page load speed by 40% and SEO performance by 30% through image optimization and code splitting — verified via Google Lighthouse audits.

ProX – Product Management, Lead Tracking & CRM Admin Portal June 2026 – Present

- Developed a full-stack admin and CRM web application using React.js, Node.js, Django and MySQL to manage leads, products, pricing and blog content for an IT hardware business.
- Designed the MySQL schema and REST APIs (Django REST Framework) for CRUD operations across 880+ products in categories like CPU, GPU, RAM, SSD, HDD, Motherboard and PSU.
- Built a Lead Management module capturing customer details (name, mobile, email), device requirements and workstation technical specs.
- Implemented pricing management with inline cost-price editing and auto-calculated margin, GST and selling price.
- Developed search, status filters, pagination and bulk Excel import/export for product listings, with image upload support for products like cabinets.
- Created a Blog Publishing module to publish content live on the company website.
- Built a responsive React.js UI with sidebar navigation and secure login/logout authentication, plus Call History and User Tracker modules for sales activity monitoring.

TECHNICAL SKILLS

Markup & Styling: HTML5, CSS3, SCSS Modules (Sass), Tailwind CSS, Responsive Web Design, Semantic Markup, Cross-browser Compatibility

Scripting: JavaScript (ES6+), TypeScript

Frameworks: React.js, Next.js (SSR/SSG)

Testing & QA: Manual Testing, Cross-browser Testing, Lighthouse Audits, ESLint, Code Review

Core Concepts: UI/UX-focused Development, REST API Integration, Agile/Scrum, Performance Optimization, SEO, Debugging

Tools & Platforms: Git, GitHub, VS Code, Figma (design handoff), Linux, Vercel/Netlify

Other Languages: Python, Java, C++ (Data Structures & Algorithms, OOP)

EDUCATION

Master of Computer Applications (MCA) — Birla Institute of Technology, Mesra (Lalpur Campus), Ranchi, Jharkhand · CGPA: 7.93 · 2022–2024

Bachelor of Computer Applications (BCA) — T.N.B. College, Bhagalpur, Bihar · 76.28% · 2017–2020

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- 5-Star ratings in Java and SQL, and a 4-Star rating in Problem Solving on HackerRank — top 10% of participants globally.
- Solved 200+ problems on LeetCode (Arrays, Trees, Dynamic Programming), earning 2 skill badges and a 30+ day streak.
